

Porthmellon Waste Management Site Development

HWRC (Household Waste & Recycling Centre)

This is the area currently under development by Wright Construction LTD and will form the main area for Household Recycling.

Containers will be arranged, for the separation of materials for recycling, making the site much easier to use.

WASTE TRANSFER STATION

This area is where all waste & recycling materials (including commercial) will end up for processing, prior to transfer to the mainland

The large shed will be used to process and store materials.

The contract to undertake these works is currently available on the Council's website (scilly.gov.uk).

INCINERATOR DEMOLITION

This is the location of the incinerator facility which was previously used to deal with some of the waste arisings. It is due to be demolished in late November.

The bunding around the site will provide visual, and to some extent noise screening, of the site.
