Re. Application no P/15/030/FUL

We write in support of this planning application to build staff accommodation adjacent to St. Agnes P.O. and General Stores. We feel strongly that, as it is so important for St. Agnes to have a well-functioning and efficient shop and Post Office it is also crucial to understand that the requirements of operating this business inevitably requires full-time commitment and the willingness to spend long working hours (particularly during the very busy visitor season; April until October) fulfilling this. Clearly living on site is a real advantage in achieving the best possible service for locals and visitors to our Island and will also ease some of the pressures involved in providing the level of service both our community and those visiting our Island expect and enjoy.

(Proprietors of our Island Shop and Post Office have traditionally lived "on site" for many years).

We hope that our opinions (as Islanders and "old Scillonians") will be given serious consideration in this case.
