**Supporting letter re: application for external cladding to Jedi, McFarlands Down**

The proposed cedar cladding would cover existing smooth render on the south elevation roof apex of the main dwelling. As this area of the building is fairly exposed to the elements, the request for cladding would help to protect and maintain this area of the dwelling to a more satisfactory level and would be in keeping with the surrounding area and neighbouring properties.

The cedar cladding would be fixed onto battens, pre-fixed to the apex area in lengths horizontally.

Yours sincerely,

Alison Hessing
