

Statement in support of application to vary conditions 1 & 2 of P/15/016

Application to vary condition 1 & 2 of P/15/016.

As the programme to demobilise and reinstate the land and fields of the Parting Carn temporary batching plant site continue, contingency measures are required to mitigate unforeseen delays and/or inclement weather. These will have a severe effect on operations and demobilising efforts especially batching and crushing.

Therefore this submission to vary conditions 1 & 2 is for the retention of batching and crushing operations, with accommodation units to support the operations to 01 April 2016.

This application is linked to the previous application P/14/057/FUL.
