

Supporting Statement for site at Lower Strand.

This site is positioned at the left hand end of the Holgates Green facing north on the road, to enable the public to queue on the pavement and not in the road. There is an electrical connection within Holgates Green which would be suitable and the supply so provided would be required to have a non-slip/trip cover as it traversed the pavement. Use of the site so close to designated recreational area with established seating can have many benefits including the ease with which any rubbish produced by the business may be collected by the trader rather than dispersed through the Town.

The successful operator must make suitable arrangements with the Authority's Waste and Recycling department for the disposal of rubbish created by their chosen trade and for the disposal of waste (grey) water which is not provided for on site.

Traders would have to provide suitable working conditions which would include the use of appropriate extraction to mitigate smells. It is proposed that the site be available for May to October in any year between 11.00 am and 2.00 pm and 6.00 pm to 9.00 pm on a daily basis with the exception of the Gig Weekend which occurs as the first bank holiday in May in any year. The site must be vacated at the end of each trading day.
