

## **COUNCIL OF THE ISLES OF SCILLY**

Application Number: P/17/070/FUL	Town and Country Planning (Environmental
	Impact Assessment) Regulations 2017
Screened by: Steph Wade	
On: 12/09/2017	

## This is a schedule 2 development by virtue of 10 (b) of Schedule 2 of the EIA Regs

1. The characteristics of development must be considered having regard in particular to:

a) the size of the development;	Proposed replacement of roof covering of dwelling together with alterations to height or rear roof section and insertion of new windows and doors.	
b) the accumulation with other development;	The proposal would be adding to the existing built environment. There would be some accumulation of built development.	
c) the use of natural resources;	There would be some use of natural resources in terms of materials of construction	
d) the production of waste;	Some production of waste from construction purposes.	
e) pollution and nuisances;	Some pollution and nuisance as a result of construction works.	
f) the risk of accidents, having regard in particular to substances or technologies used.	Likely to be low risk of accidents having regard to the standard technologies to be used.	

2. The environmental sensitivity of geographical areas likely to be affected by development must be considered having regard, in particular, to:

a) the existing land use;	The existing land use is residential.
b) the relative abundance, quality and regenerative capacity of natural resources in the area;	Outside the site there is a high abundance of high quality natural resources, both coastal and countryside of both designated international importance and local nature reserves.

c) the a	absorption capacity of the natural	The application is for the replacement of the
enviror	nment, paying particular attention to the	existing roof covering material with natural
followi I. II. III. IV.	ng areas:  Wetlands; Coastal zones; Mountain and forest areas;	slates to a dwelling and other external alterations to the appearance of the dwelling and the height of the roof. The absorption capacity of the natural environment is considered to be high.
VI.	Area in which the environmental quality standards laid down in Community legislation have already been exceeded;	
VII.	•	
VIII.	Landscapes of historical, cultural or	
	archaeological significance;	

3. The potential significant effects of development must be considered in relation to criteria set out under paragraphs 1 and 2 above, and having regard in particular to:

a) The extent of the impact (geographical areas and size of the affected population);	The impact will be limited to the building and the site
b) The trans-frontier nature of the impact;	There will not be any trans-frontier impacts
c) The magnitude and complexity of the impact;	Low
d) The probability of the impact;	Low
e) The duration, frequency and reversibility of the impact.	The proposed alterations and extensions to the building will be permanent and irreversible

Q1	Is it a major development which is of more than local importance?	N
Q2	Does it affect a particularly environmentally sensitive or vulnerable location?	N
Q3	Does it have unusually complex and potentially hazardous environmental effects?	N

Conclusion		
Environmental Impact Assessment	Not required.
