

COUNCIL OF THE ISLES OF SCILLY

Application Number: P/17/103/FUL	Town and Country Planning (Environmental
	Impact Assessment) Regulations 2017
Screened by: Stephanie Wade	, ,
On: 13 th December 2017	

This is a schedule 2 development by virtue of 10 (b) of Schedule 2 of the EIA Regs

1. The characteristics of development must be considered having regard in particular to:

a) the size of the development;	Erection of two infill extensions to existing three detached units of staff accommodation. Both extensions will have a footprint of 31.2sqm each and a mono pitched roof with a height of 2.6 metres.
b) the accumulation with other development;	There would be some accumulation of built development.
c) the use of natural resources;	Some use of natural resources in terms of the materials of construction.
d) the production of waste;	Production of waste from construction process.
e) pollution and nuisances;	Some pollution and nuisance as a result of construction works.
f) the risk of accidents, having regard in particular to substances or technologies used.	Likely to be low risk of accidents having regard to the standard technologies and methods to be used.

2. The environmental sensitivity of geographical areas likely to be affected by development must be considered having regard, in particular, to:

a) the existing land use;	The existing land use is residential.
b) the relative abundance, quality and regenerative capacity of natural resources in the area;	Outside the site there is a high abundance of high quality natural resources, both coastal and

		countryside of both designated international importance and local nature reserves.
c) the absorption capacity of the natural		The application is for the infill extension to attach
environment, paying particular attention to the		three units of staff accommodation. The
following areas:		absorption capacity of the natural environment is
	Wetlands; Coastal zones; Mountain and forest areas; Nature reserves and parks; Areas classified or protected under Member states' legislation; areas designated by Member States pursuant to Council Directive 79/409/EEC on the conservation of Wild Birds (a) and Council Directive 92/43/EEC on the conservation of natural habitats and of wild fauna and flora (b);	considered to be high.
VI.	Area in which the environmental quality standards laid down in Community legislation have already been exceeded;	
VII. VIII.	Densely populated areas;	

3. The potential significant effects of development must be considered in relation to criteria set out under paragraphs 1 and 2 above, and having regard in particular to:

a) The extent of the impact (geographical areas and size of the affected population);	The impact will be limited to the building.
b) The trans-frontier nature of the impact;	There will not be any trans-frontier impacts
c) The magnitude and complexity of the impact;	Low
d) The probability of the impact;	Low
e) The duration, frequency and reversibility of the impact.	The proposed construction and associated works would be permanent and irreversible.

Q1	Is it a major development which is of more than local importance?	N	
Q2	Does it affect a particularly environmentally sensitive or vulnerable location?	N	
Q3	Does it have unusually complex and potentially hazardous environmental effects	? N	

Conclusion			
Conclusion	Not required.
