6.	Management of Waste on Site	7

1. Introduction

- 1.1.1 This document accompanies an application for full planning permission for the erection of a single storey extension, new external play area, buggy store (canopy) and associated landscape works, at the Craftikids Day Nursery, Carn Gwaval. The document encourages the construction team, for the proposed new development, to embrace the principles of the Site Waste Management Plan as required by the former Site Waste Management Regulations 2008 (repealed 1st December 2013).

1.2. Address of property

Craftikids Day Nursery,
Carn Gwaval Wellbeing Centre,
Carn Gwaval,
Church Road, St. Mary's,
Isles of Scilly, TR21 0NA.

1.3. Project Client

The Council of the Isles of Scilly

1.4. Principle Contractor

Yet to be appointed

1.5. Project Summary

The proposed works comprise a single storey extension to the west elevation and part refurbishment of the existing nursery, a new external play area and canopy, secure fencing to the new and existing external play areas, a cycle and buggy shelter and new bitmac hardstanding.

1.6. Anticipated Project Start Date

July 2018

1.7. Project Duration

5 Months

1.8. Person Responsible for Management of Waste

Principle contractor

2. Objectives

2.1.1 The project objectives with regard to waste are:

- To take all reasonable steps to ensure that waste management controls are observed;
- To minimise the amount of waste generated and maximise the amount of waste reduced and recycled;
- To reuse as much waste as possible on-site. Where reuse on-site is not possible to identify the most appropriate waste management option in line with the waste hierarchy;
- To manage waste as close as possible to the site location; and
- To provide training to improve awareness of waste management issues with all staff and sub-contractors and to ensure correct waste management practices are followed on-site.

3. Responsibilities

3.1.1 The responsibilities in relation to the Site Waste Management Plan are set out below.

3.1.2 The 'Site Waste Coordinator' will be responsible for the implementation of the SWMP. Duties include but are not limited to:

- Ensuring waste is managed on site according to the Site Waste Management Plan. This includes ensuring appropriate segregation of waste on-site, making arrangements for the removal of waste from the site;
- Ensuring all staff and sub-contractors understand their duties in relation to the Site Waste Management Plan. This includes organising appropriate training;
- Ensuring correct records and documentation is kept. This includes checking waste transfer documentation, and maintenance of documentation relating to waste transfer;
- The 'Site Waste Coordinator' is the point of contact for all staff, contractors and waste contractors in relation to the Site Waste Management Plan and waste management issues; and
- All contractors' staff and operatives working on site are responsible for adhering to the principles of the Site Waste Management Plan. This includes attending training as specified and following arrangements for the movement and segregation of waste on site.

4. Waste Contractors

4.1.1 All waste contractors are responsible for adhering to the Site Waste Management Plan including:

- All waste contractors are responsible for ensuring compliance with their Duty of Care including providing the appropriate records to the 'site waste coordinator'.

- All waste contractors are responsible for ensuring waste is managed off-site as specified in the Site Waste Management Plan. They are responsible for ensuring the waste treatment facilities have a waste license and that records are provided to the 'site waste coordinator'.
- Waste contractors are responsible for removing waste off-site and transporting it to a licensed waste management facility.
- Waste contractors are responsible for providing adequate containers for the collection and segregation of waste as specified in the Site Waste Management Plan.

5. Waste and Management Options

- 5.1.1 Details of the waste arising from the project would be prepared by the Principle Contractor by completing waste data sheets. These data sheets would also detail the site waste management options proposed for each waste type.

6. Management of Waste on Site

- 6.1.1 The Principle Contractor shall adopt the materials that will be re-used or recycled on site will be segregated and stockpiled in designated areas. Reprocessing, where applicable, will take place in these areas. Reprocessing, where applicable will take place in these areas. The locations of the designated areas shall be identified by the contractor prior to commencement of development.
- 6.1.2 Materials that will be removed from site will for recycling will be segregated from the waste stream and collected in containers for transport.
- 6.1.3 All waste that can be reused or recycled must be segregated out of the waste stream by staff and sub-contractors.
- 6.1.4 Contamination of the waste containers will be monitored.
- 6.1.5 At the end of each day all staff and contractors must ensure that waste is moved to the appropriate area.
- 6.1.6 All lockable containers will be locked at the end of each day.
- 6.1.7 Any problems found with arrangements for waste segregation should be reported directly to the site waste coordinator.
