

## VERTICAL SLIDING WINDOWS

The graceful style of sash windows is difficult to beat. But timber sashes, particularly old ones, are troublesome and require regular maintenance. The Spectus **Vertical Slider** has been designed to provide the authentic, period appearance without the drawbacks. It's so good that planning departments have accepted it – even in conservation areas.

When we designed our **Vertical Slider**, we kept the basics: the elegant proportions and the two sliding panes that are so effective for ventilation. After that, we worked on improvements. Our **Vertical Sliders** have:

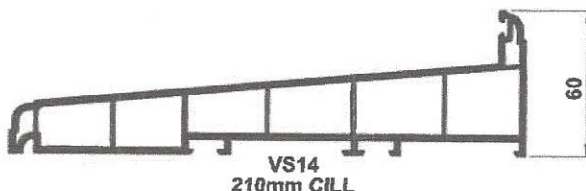

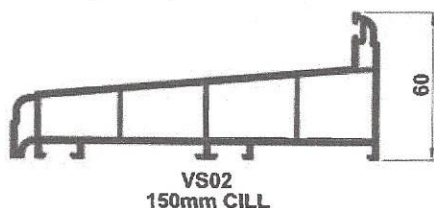

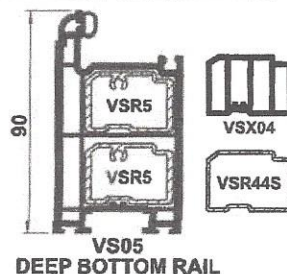

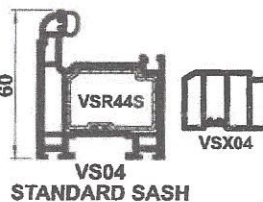

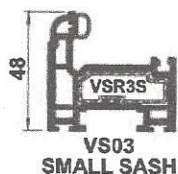

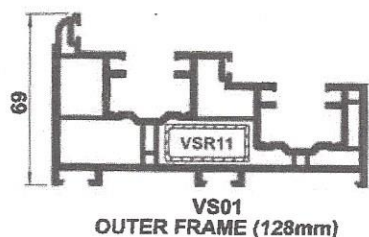

There are optional Georgian bars and sash horns to match original designs and a consistent period look with ovolo detailing to the frame, sash, beads and cills. These are beautiful, sliding-sash windows that are easy to maintain, insulating and secure. What's more they can achieve a Band 'A' Window Energy Rating. Grace and elegance are now combined with performance and all the benefits of 21<sup>st</sup> century materials and technology

- Panes that tilt inwards for ease of cleaning
- Child safety catches
- Reliable, easy-action balance mechanisms
- Energy-efficient double glazed panes
- Pile seals to prevent draughts
- Unobtrusive flush gaskets
- Secure locking mechanisms
