Dear Andrew

Please find the revised red line location plan as requested. This now shows the access - which is essentially along the existing track.

In terms of block plan details no boundary treatments are proposed. There is no proposed change to the septic tank so this is not part of the development consent we are seeking.

There are no above ground proposals. Bin storage and bike parking would be accommodated in the open courtyard area within the Battery so would not appear above ground, it will be informal.

The plan **P16007103A Basement Plan and Elevation Proposed** shows the full extent of the basement floor plan, you will note from the location plan that the boundary is tight to the structure.

I hope that is sufficient information to register the application?

Please note I am on holiday for two weeks so if there is any additional information required can you please let the applicant know directly? He is copied in to this email so you have his details if required.

Kind regards,

Lisa
