

## **COUNCIL OF THE ISLES OF SCILLY**

Application Number: P/19/045/HH	Town and Country Planning (Environmental
	Impact Assessment) Regulations 2017
Screened by: Yvonne Dale	
On: 5 <sup>th</sup> September 2019	

## This is a schedule 2 development by virtue of 3 (i) of Schedule 2 of the EIA Regs

1. The characteristics of development must be considered having regard in particular to:

a) the size of the development;	The development includes the conversion of part of an existing attached garage at ground floor, raising the ridge height of the garage roof to facilitate a loft conversion. The proposed increase in floor area is approximately 44m².	
b) the accumulation with other development;	The proposed development would alter the existing built environment, with the addition of first floor dormers above the garage and the increase in the garage roof height.	
c) the use of natural resources;	There would be some use of natural resources in terms of materials of construction.	
d) the production of waste;	Some production of waste for construction purposes.	
e) pollution and nuisances;	Some pollution and nuisance as a result of construction works.	
f) the risk of accidents, having regard in particular to substances or technologies used.	Likely to be low risk of accidents having regard to the standard technologies and methods to be used, as well as the nature and scale of development proposed	

2. The environmental sensitivity of geographical areas likely to be affected by development must be considered having regard, in particular, to:

a) the existing land use;	The existing land use is a single dwelling house

b) the relative abundance, quality and regenerative capacity of natural resources in the area;		Outside the site there is a high abundance of high quality natural resources, both coastal at countryside of both designated international importance and local nature reserves.	
enviror	absorption capacity of the natural nment, paying particular attention to the ng areas:	The absorption capacity of the natural environment is considered to be high.	
	Wetlands; Coastal zones; Mountain and forest areas; Nature reserves and parks; Areas classified or protected under Member states' legislation; areas designated by Member States pursuant to Council Directive 79/409/EEC on the conservation of Wild Birds (a) and Council Directive 92/43/EEC on the conservation of natural habitats and of wild fauna and flora (b);		
VII.	Area in which the environmental quality standards laid down in Community legislation have already been exceeded; Densely populated areas; Landscapes of historical, cultural or archaeological significance;		

3. The potential significant effects of development must be considered in relation to criteria set out under paragraphs 1 and 2 above, and having regard in particular to:

a) The extent of the impact (geographical areas and size of the affected population);	The impact will be limited to the building and the site.
b) The trans-frontier nature of the impact;	There will not be any trans-frontier impacts
c) The magnitude and complexity of the impact;	Low
d) The probability of the impact;	Low
e) The duration, frequency and reversibility of the impact.	The proposed development would be permanent and irreversible.

Q1	Is it a major development which is of more than local importance?	N
Q2	Does it affect a particularly environmentally sensitive or vulnerable location?	N
Q3	Does it have unusually complex and potentially hazardous environmental effects?	N

Conclusion  Environmental Import Assessment	Not required	
Environmental Impact Assessment
