Dear Planning Dept

Ref: P/20/035 _ 3 Electrical Vehicle charging points at Mermaid car park

Re: The above planning application. I am concerned that the financial resources used to install three electrical vehicle charging points will be wasted, as they may not be able to withstand the sea water, salt erosion, sand, seaweed etc, thrown up in the winter gales.

The damage these gales cause, often render the Mermaid car park unsafe to use.

I have attached a photo of one of last winter's gales.

Yours sincerely

Anita Bedford
