Subject: Revised Planning Application P/20/054

Dear Ms Walton,

I am writing to object to the Planning Application P/20/054 as revised in October 2020.

The proposed development would be over-dominant and out of proportion in its setting, lacking a proper sympathetic relationship with the character of the existing built environment in the immediate vicinity.

The proposed building is also unduly massive both in relation to the cottages close by and in the general vista when looking in to the area, thereby adversely impacting the visual amenity of the neighbourhood, which would be particularly unfortunate owing to its proximity to the very popular coastal path.

This application should be refused until a more sensitive project is put forward, on land which the applicant actually owns and not including land apparently incorrectly claimed.

Yours sincerely,

Janet Vosper
