Please see attached a few pictures showing the stretch of trees. To be honest its quite difficult to get the issue across via photographs however I would be happy to meet you on site to discuss if that would help.

The crown will only be lifted by a small amount however it will differ from tree to tree, the bulk of the work will involve removing all of the deadwood in the canopy.

I trust the above and attached are in order, if you need any more information or have any queries please do not hesitate to contact me.

Kind regards

Charles
