### [Comments here](#)

Thank you for consulting us on this application. We note our comment made on the 16th April 2020 that a watching brief was advised on the original application, resulting in Condition 8 of Decision P/20/016/FUL in relation to archaeological recording.

The application site is within the Buzza Hill Archaeological Constraint Area and the proposed site plan submitted as part of the present application shows that the revised building will have a larger footprint than originally proposed. Therefore, our advice is the same as originally provided on P/20/016/FUL, in that -

We therefore consider it prudent that an archaeological watching brief should be carried out during the early stages of groundworks, undertaken by a suitably qualified organisation or individual. We would advise, for the above reasons, that any consent issued should carry the condition as worded below of sections A-D inclusive (please do not split into separate Conditions or treat separately), which includes words recommended by the Association of Local Government Archaeological Officers (ALGAO), as follows:

A) No demolition/development shall take place until a programme of archaeological recording work including a Written Scheme of Investigation has been submitted to and approved by the local planning

authority in writing. The scheme shall include an assessment of significance and research questions, and:

1. The programme and methodology of site investigation and recording
2. The programme for post investigation assessment
3. Provision to be made for analysis of the site investigation and recording
4. Provision to be made for publication and dissemination of the analysis and records of the site investigation
5. Provision to be made for archive deposition of the analysis and records of the site investigation
6. Nomination of a competent person or persons/organisation to undertake the works set out within the Written Scheme of Investigation

B) No demolition/development shall take place other than in accordance with the Written Scheme of Investigation approved under condition (A).

C) The development shall not be occupied until the site investigation and post investigation assessment has been completed in accordance with the programme set out in the Written Scheme of Investigation approved under condition (A) and the provision made for analysis, publication and dissemination of results and archive deposition has been secured.

D) The archaeological recording condition will normally only be discharged when all elements of the WSI including on site works, analysis, report, publication (where applicable) and archive work has been completed.

A pre-commencement condition is necessary in this instance due to the need to ensure that a programme and methodology of site investigation and recording of archaeological features is undertaken before physical works commence on site. This is in accordance with the provisions of NPPF (2019) Chapter 16, paragraph 199 and the Isles of Scilly Local Plan (2015-2030) policy OE7.
