I can see from the application information that I am too late to make a formal objection, but having just seen this application I feel I would still like to comment even if this will not be considered.

I agree with many of the comments made raising concerns about this application.

Certainly the archeological constraints surrounding Buzza Hill and the area should be looked at and considered.

Concerns that with sea levels expected to rise that this should curtail any such application. I cannot see how this build can be protected for local housing and feel the size and design is much out of keeping with the area.

The future limit on public access and space and it's reduction with this application is of serious concern, therefore I object wholeheartedly to this proposal.

All the best.

Alison King.
