With regard the application to remove the Holly tree of the above reference, I wish to object to this as the tree is not dead. It has a lot of green foliage, and it is also sprouting from the trunk.

The tree is very old judging from the size of its trunk, and using the recommended measurement/calculation its age is in the region of 120 years.

The tree needs some TLC to remove some dead branches, not cutting

down. Signed; K Simpson.
