Thank you for consulting us on this application for outline consent for a dwelling. We have consulted the Cornwall & Isles of Scilly Historic Environment Record and note the results of an archaeological watching brief undertaken 95m to the north east of the application site. This revealed a number of small pits which included finds of pottery and flint, suggesting activity extending from between the Mesolithic and Late Iron Age or Romano-British periods. The flint included a worked fragment of Portland chert, an unusual find for the Isles of Scilly (AC Archaeology 2017, report ACD1618/2/0).

We therefore consider it prudent that an archaeological watching brief should be carried out during the early stages of groundworks, undertaken by a suitably qualified organisation or individual. We advise, for the above reasons, that any consent issued should carry the condition as worded below of sections A-D inclusive (please do not split into separate Conditions or treat separately), which includes words recommended by the Association of Local Government Archaeological Officers (ALGAO), as follows:

A) No development shall take place until a programme of archaeological recording work including a Written Scheme of Investigation has been submitted to and approved by the local planning authority in writing. The scheme shall include an assessment of significance and research questions, and:

1. The programme and methodology of site investigation and recording
2. The programme for post investigation assessment

Council of the Isles of Scilly

Planning Application

Ref: P/22/003/OUT

3. Provision to be made for analysis of the site investigation and recording
4. Provision to be made for publication and dissemination of the analysis and records of the site investigation
5. Provision to be made for archive deposition of the analysis and records of the site investigation
6. Nomination of a competent person or persons/organisation to undertake the works set out within the Written Scheme of Investigation.

B) No development shall take place other than in accordance with the Written Scheme of Investigation approved under condition (A).

C) The development shall not be occupied until the site investigation and post investigation assessment has been completed in accordance with the programme set out in the Written Scheme of Investigation approved under condition (A) and the provision made for analysis, publication and dissemination of results and archive deposition has been secured.

D) The archaeological recording condition will normally only be discharged when all elements of the WSI including on site works, analysis, report, publication (where applicable) and archive work has been completed.

A pre-commencement condition is necessary in this instance due to the need to ensure that a programme and methodology of site investigation and recording of archaeological features is undertaken before physical works commence on site. This is in accordance with the provisions of NPPF (2021) Chapter 16, paragraph 205 and the Isles of Scilly Local Plan policy OE7.
