Site Description and Proposed Development

Springfield Court is a two-three storey granite built terrace fronting the north end of Church Street. The building is split into flats with units on the ground floor, first floor and extending up into the roof space on the third floor. The flats are used as a mix of residential units and holiday lets.

The roof is covered in a dark fibre cement tile with rooflights and there are large white painted timber sliding sash windows and timber doors (to access the ground floor flats) throughout creating a balanced and attractive street scene. Around to the rear of the flats are gardens and parking areas with modern extensions providing the entrances up to the upper storey flats. There are a mix of timber and UPVC windows to the rear with doors to access the rear of the ground floor flats. Parts of the extensions and the dormers are clad in a wood effect cladding. Flat 1 is on the ground floor at the western most end of the building.

This proposal is for the replacement of 4 no windows and door all of which are single glazed white painted timber and located to the rear of the building with white upvc double glazed units. Of all the units, only one is of a traditional sliding sash style which is set on the granite wall forming the main rear elevation, the rest are in more modern rendered walls around the rear extension.
