Dear Liv Rickman

APPLICATION FOR THE INSTALLATION OF GEOBAGS AT PERIGLIS TO REPLACE THE CORE OF EXISTING DUNES, WRAPPED IN GEOTEXTILE AND COVERED WITH EXCAVATED MATERIAL AND TO STABILISE THE DUNE CREST WITH GEOMAT TO ENCOURAGE RE-VEGETATION. INSTALLATION OF ROCK BAGS AT PORTH COOSE TO HEIGHTEN THE EXISTING PROTECTION, BACKED BY EARTH BUND AND INSTALLING ROCK ARMOUR AT THE BOTTOM OF THE EXISTING SEA WALL AT PORTH KILLIER. TO REDUCE THE RISK OF COASTAL FLOODING ON ST AGNES. (EIA DEVELOPMENT) (MAJOR DEVELOPMENT) LAND ADJ TO WASTE SITE, THE QUAY, ST AGNES, ISLES OF SCILLY

Thank you for consulting us on this development.

Environment Agency Position

We remove our objection to this development

I can confirm that the arrangement for the Geobag shown in drawings DKR6499-110-D310 rev 03 and DKR6499-110-D110 Rev 03 is in line with the recommendations given in our original response to the application.

Reasons

Our comments about the proposed ridge profile and height remain, but these will not now have an impact on the Geobag structure, given its set back location. This may result in the exposure of the geomat at the seaward edge overtime. However, this should not in itself impact on the function of the structure or significantly influence the behaviour of the dune/shingle ridge.

Yours sincerely
