Site Description and Proposed Development

The Old Post Office is a two storey dwellinghouse set in a row of dwellings on the higher north side of the main track running through the main settlement on the island of Bryher. The settlement is set on a slope running down past the property which is elevated and looks above the row of dwellings to the south of the track with views out over Tresco Channel to St Mary's.

The dwelling is of granite construction with a natural slate roof, white painted timber windows, fascias, soffits and black rainwater goods. The conservatory subject to the application is located on the west side of the central porch on the front elevation and is a lean-to design constructed of brown stained softwood glazing bars with double glazed panels sat on a rendered concrete block panel wall. The roof is made from double glazed panels with white painted timber cappings between.

The proposal is to replace the existing conservatory with one of the same scale on the same footprint with a air-dried oak frame in a natural oiled finish with double glazed panels with brown aluminum cappings between the roof panels which are also double glazed. The glazing bar pattern is to be simplified with the number of panels to be reduced and the horizontal row of windows removed. The structure would sit on a granite faced dwarf wall.
