

Address: "GRAYS" The Bank St Mary's Isles of Scilly. TR21 0HY.

The internal alteration works have been ongoing as the previous planning application was approved.

During these internal works some of the previous works were deemed unacceptable so the works stopped & a structural engineers report requested on how to progress the works forward.

Due to a time lapse from planning approval to the actual works being carried out it was advised to apply for a Law Development Certificate to the planned works were allowed to carry on.

The attached pictures show how the works began & their current halted stage.

Once the Lawful Development Certificate is approved, works will then commence again through to completion.

The current state is not a listed building & will be upgraded due to the works into 3 self contained flats.
